

Guide Pins for All-on-4 Technique

Sterngold Dental is pleased to announce it now offers Guide Pins. The traditional laboratory procedures for the All-on-4 technique utilize the Multi-unit Abutment. Many technicians use a 15mm Guide Pin in the Multi-unit Abutment during fabrication. However, some companies require you to buy an Open Tray Impression Coping for the Multi-unit Abutment in order to get the 15mm Guide Pin. Sterngold's 15mm Guide Pin is sold separately in packages of 25. If you are a technician who uses the All-on-4 technique frequently, buying these pins can save you a lot of money. To order call 800-243-9942 or visit www.sterngold.com.

Jack B Nimble

PDT, Inc., introduces Jack B. Nimble Scaler (R130). Continuous curved blade, contra-angle scaler designed so optimal blade surface is in direct contact with tooth surface. Allows positive lateral pressure in anterior and premolar regions. Jack B. Nimble, Jack be quick! Ideal for pedo, ortho, crowded, rotated, lingual-version teeth. Like all other PDT periodontal instruments, it is light weight, well balanced and incredibly sharp. Visit PDT at the CDS Chicago Midwinter Booth 4739. Visit www.pdtdental.com or call 800-240-9895 for more information.

New Products

If you would like to submit a new product for consideration to appear in this section, please send your press releases to Associate Editor Krista Houstoun at krista@farranmedia.com.

Implant Scalers – 137 and 204 styles

Now available from Premier Dental Products Company, the 137 (anterior) and 204 (posterior) style implant scalers complement the original Facial (Goldman Fox) and Universal (4L/4R) and offer a full selection to dental professionals. Premier Implant Scalers are made from fiber-reinforced graphite that will not scratch implant surfaces. The tips are thin and sharp with well-defined edges. The graphite is strong yet slightly flexible, allowing the tips to access tight areas effectively and safely. The redesigned handle has textured grips and a larger diameter for greater comfort and control. Premier Implant Scalers can be reused and are autoclavable (273°F / 134°C); available in two- and five-instrument packs. Contact your authorized dealer for 3+1 introductory special offers on Premier instruments.

3.7mmD Trabecular Metal Dental Implant

Zimmer Dental, Inc., a leading provider of dental oral rehabilitation products, announced the availability of the 3.7mmD *Zimmer Trabecular Metal* Dental Implant in select global markets. Combining the popular features of the *Tapered Screw-Vent* Implant with the unique properties of *Trabecular Metal* Material (now with more than three years of clinical research in dental indications) the newest member of the *Trabecular Metal* Dental Implant family is *The Best Thing Next To Bone* for the aesthetic zone. The 3.7mmD *Trabecular Metal* Dental Implant is the first anterior dental implant to offer a *Trabecular Metal* Material mid-section, with up to 80 percent porosity, intended to enable osseoincorporation through bone ongrowth *and* bone ingrowth in a process new to implant dentistry. Contact a Zimmer Dental Sales Consultant or Customer Service at 800-854-7019 or 760-929-4300 (outside the U.S.), or visit TrabecularMetal.ZimmerDental.com for more information.
