### Kwikly

Kwikly, a Minneapolis-based startup, is entering the dental temping industry with its connective technology platform.

Unlike a conventional temp agency, Kwikly uses a mobile platform to facilitate scheduling and communication between temporary personnel and dental offices. Dental practices can now reach temps directly, in real time, much like a commuter can reach an Uber or Lyft. The company's on-demand mobile app streamlines the dental staffing experience for its professionals and its offices while it strives to efficiently connect the dental community.

### ProStyle E Electric Handpiece System

The ProStyle E Electric Handpiece System by Lares Research is designed to deliver power, precision and sound quality while minimizing hand fatigue. The system includes an autoclavable motor, a motor control box, a 1:5 high-speed fiber-optic contra angle, a 1:1 low-speed fiber-optic contra angle and a 1:1 straight attachment.

By shortening the Mini contra angles and motor by 40 percent and reducing their weight by 33 percent, Lares shifted the balance point forward, maximizing comfort and control. ProStyle E requires no installation and can be easily transported between operatories. For more information, visit [laresdental.com](http://laresdental.com).

### Alpha Air 6

Seiler Medical has launched its latest microscope, the Alpha Air 6, to the international market. With the Alpha Air 6, dentists can maintain an upright, working position while keeping visual contact with a patient. The microscope's design allows dentists to make a concerted effort to avoid the long-term effects that come with working in an uncomfortable position.

The product allows for up to six steps of magnification with its German apochromatic lenses and a bright LED illumination at 150,000 lux. It has a built-in USB port and a 12-volt power supply, allowing for more continuous use without recharging the battery.

### BrioShine Feather Lite Composite and Ceramic Single-Use Polishers

Brasseler USA has expanded its family of Brio single-use diamond, carbide and polishing instruments with the recent introduction of new BrioShine Feather Lite Composite and Ceramic single-use polishers. They are ideal for the universal polishing and finishing of ceramic and composite materials.

BrioShine Feather Lite Composite and Ceramic single-use polishers adapt to most tooth surfaces, yet are durable enough to last through multiple restorations. Compared to most polishing systems, these polishers eliminate time spent polishing by reducing the number of steps required for optimal results.
