

We are pleased to present the winners of the 2014 Townie Choice Awards (TCAs). For the last 12 years, thousands of Townies have voted for their favorite products and services in the dental profession. The TCAs serve as a compass, pointing the way to the dental industry product and service aces, as chosen by your peers. Herein, we present the winners, the reigning champions and the new victors alike. We proudly present your 2014 Townie Choice Award results!

Desensitizer

Coltène: **ParaPost Fiber Lux/Taper Lux**

ParaPost Fiber Lux and Taper Lux are made of a translucent, light-transmitting, fiber-resin material. They can be used with self- or dual-cured materials for fast cementation. The double-undercut, rounded-head design reduces stress points and locks in composite core materials. It's available in 10 sizes. For more information, call 800-221-3046.

Aesthetic Post Systems

Ultradent Products, Inc.: **UltraEtch**

Ultradent's Ultra-Etch is the only self-limiting phosphoric acid dentin etchant on the market. Ultra-Etch is a viscous 35 percent phosphoric acid solution. Used with Ultradent's Blue Micro or Inspiral brush tip, Ultra-Etch can penetrate into the smallest fissures on occlusal surfaces. It also allows for precision placement on vertical surfaces with no migration.

(Votes: 254 of 757)

Etch

Ultradent Products, Inc.: **Ultrapak Retraction Cord**

Ultradent's Ultrapak Cord is a one-of-a-kind knitted cord formed by thousands of tiny loops which create long interlocking chains. When packed, the loops compress to express hemostatic astringent to underlying tissues. It continues to exert a gentle continuous outward force as the loops begin to expand keeping the cord in place.

Gingival Retraction Materials

GC America, Inc.: **GC Fuji IX GP (Regular or Fast)**

GC Fuji IX GP is the easy-to-use, fluoride-releasing alternative to expensive comonomers, composites and amalgam. As a true glass ionomer, it chemically bonds to tooth structure, has a tooth-like coefficient of thermal expansion, is wear resistant, and delivers rechargeable fluoride. It is available in hand-mix powder-liquid and premeasured capsules.

Hemostatic Agent

Triodent Corporation: Wave-Wedge/V-Wedge

Not required for separation, the Wave-Wedge's role is to provide an optimal anatomical approximation and a broad, reliable seal against the matrix band at the gingival margin. The wedge's concavity and central "wave" shape make it easy and safe to insert – self-guiding, self-locating and gentle on the papilla.

(Votes: 146 of 757)

FREE FACTS,

Matrix Materials: Wedges

Triodent Corporation: V3/V-Ring Sectional Matrix Systems

The nickel-titanium V3 Ring applies optimal separation force to achieve consistently tight contacts. The ring's V-shaped tines straddle the Wave-Wedge and the breadth of the tines prevents the ring from collapsing into large cavities. The V3 Tab-Matrices recreate the proximal anatomy of the tooth, so there is minimal finishing.
