RADIOLOGY

X-Ray Equipment: Digital X-Ray Sensors

DEXIS: INTRAORAL DIGITAL SENSOR

The award-winning Dexis sensor provides highly detailed radiographic images for optimal diagnosis. Workflow is faster with this PerfectSize single-sized sensor system. Clinicians and patients benefit from the sensor's beveled corners and smooth edges that allow quick, easy and comfortable placement.

X-Ray Equipment: Panoramic/Cephalometric Machines (Digital)

PLANMECA USA: PROMAX S3

Planmeca ProMax S3: The industry's No. 1 digital panoramic X-ray. The Planmeca ProMax S3 revolutionizes routine diagnostic imaging with anatomically accurate extraoral bitewings, possible only with patented SCARA technology. These extraoral bitewings eliminate gagging and capture a greater number of surfaces for better caries detection versus intraoral modalities.

RESTORATIVE DENTISTRY

Aesthetic Post Systems

COLTÈNE: PARAPOST FIBER LUX/TAPER LUX

ParaPost Fiber Lux and Taper Lux are made of a translucent, light-transmitting, fiber-resin material. They can be used with self- or dual-cured materials for fast cementation. The double-undercut, rounded-head design reduces stress points and locks in composite core materials. It's available in 10 sizes. For more information, call 800-221-3046.

Articulating Paper

PARKELL: ACCUFILM II OCCLUSAL MARKING FILM STRIP BOOKLET

Ideal for precision equilibration, AccuFilm is a super-sensitive articulating film just 21 microns thick. That's less than 1/3 the thickness of some papers and about 1/5 the thickness of ribbons. AccuFilm won't trigger mandibular reflexes that might skew the bite. Despite its super-thinness, AccuFilm stretches ... it doesn't break. AccuFilm is available single-sided or double-sided.

Attachments

ZEST DENTAL SOLUTIONS: LOCATOR ATTACHMENT SYSTEM

The LOCATOR Implant Attachment System with patented pivoting technology is the premier system for implant-retained overdentures. According to recent studies, a two implant-retained, tissue-supported overdenture restoration is considered the new minimum standard of care for edentulous patients. More than two implants may also be placed for an implant-supported overdenture.

Gingival Retraction Materials

ULTRADENT PRODUCTS: ULTRAPAK RETRACTION CORD

Ultradent's Ultrapak Cord is a one-of-a-kind knitted cord formed by thousands of tiny loops that create long interlocking chains. When packed, the loops compress to express hemostatic astringent to underlying tissues. It continues to exert a gentle continuous outward force as the loops begin to expand, keeping the cord in place.

Matrix Materials and Systems

GARRISON DENTAL SOLUTIONS: COMPOSI-TIGHT SECTIONAL MATRIX SYSTEM

The new Composi-Tight 3D Fusion system draws on Garrison's more than 20 years of sectional matrix leadership to produce its most comprehensive and easy-to-use system. The three-ring system consists of a short (blue), tall (orange) and dentistry's first wide preparation (green) separator rings. All three incorporate Garrison's exclusive Soft-Face silicone tips for flash reduction and Ultra-Grip retention extensions that eliminate ring "spring-off." This comprehensive kit includes three varieties of separator rings, five sizes of matrix bands, four sizes of interproximal wedges and a ring placement forceps. Composi-Tight 3D Fusion is indicated for use in posterior Class II MO/DO, MOD and wide preparation restorations.

Matrix Materials: Wedges

GARRISON DENTAL SOLUTIONS: GARRISON WEDGES

The 3D Fusion Ultra Adaptive Wedge has a patent-pending design that combines a Soft Face overmold with a firm inner core and advanced mechanical features to produce a wedge with improved adaptation to interproximal irregularities. While insertion and separation are significantly improved with the new design, soft retentive fins help to prevent back-out, even when wet. The wedges are available in an assortment kit as well as a range of sizes (extra-small, small, medium and large). For more information, call 888-437-0032 or visit garrisondental.com.
