

▶ ALIGN TECHNOLOGY

Invisalign

The Invisalign system comes with innovations clinically proven to work together to deliver predictable clinical results by creating the right force system to improve tooth movement. Align Technology continually invests in research and development, resulting in a steady cadence of significant product evolutions, and has developed a modern, fully digital orthodontic platform that helps orthodontists provide excellent clinical outcomes and a great experience for their patients.

* invisalign® | iTero®

HIGHLIGHTS

- **Feels better and fits better** than other aligners (compared with aligners made of off-the-shelf, single-layer 0.03-inch material).
- **More predictability.** Innovations that move more smiles with greater predictability and control (compared with aligners made of off-the-shelf, single-layer 0.03-inch material).
- Now faster: **Up to 50% shorter treatment times** with weekly aligner changes when compared with two-week aligner wear.
