

Continuing Education, In Your Pajamas

Free Online CE at Dentaltown.com

Save time and money with Dentaltown Plus Online CE at www.dentaltown.com. View slides, hear the speaker, manage your CE credits—all at the touch of a button. Now, earn CE on your own time, and if you'd like, in your pajamas. No need to take notes; all courses are accessible 24 hours a day, seven days a week.

Each course is valued at two CE credits

The Bacterial Origins of Periodontal Disease & the Perio/Systemic Links

Speaker: Richard H. Nagelberg, DDS

Synopsis:

This course will discuss biofilm development and contribution to disease as well as the inflammatory response. The two pathways of periodontal tissue destruction and details of cellular and clinical events occurring in periodontal disease will be addressed. Research evidence regarding the relationship between periodontal disease and risk factors for various systemic conditions will be presented.

Educational objectives: Upon completion of this course, participants should be able to achieve the following:

1. Understand the complexity of biofilms
2. Understand the bacteria associated with disease and health
3. Understand the two mechanisms of periodontal tissue destruction
4. Understand details occurring when periodontal disease exists
5. Understand the perio/systemic links

This CE activity is supported by an unrestricted grant from OraPharma, Inc.

The Powerprox Six Month Braces™ Technique. The Next Step in the Cosmetic Dentistry Revolution

Speaker: Dr. Richard J. DePaul, Jr.

Synopsis:

During the course Dr. DePaul will discuss the pieces of the Powerprox Six Month Braces™ technique puzzle and how to use these pieces to give patients great smiles in a short period of time. He will also discuss the advantages of combining PPSMB with cosmetic dentistry to give a finer result than could have been obtained by either alone.

Educational objectives: Upon completion of this course, participants should be able to achieve the following:

1. Learn how PPSMB can increase not only orthodontic starts but also other cosmetic and general dentistry procedures as well.
2. Understand how doctors and patients view esthetics differently.
3. Understand how to utilize the pieces of the PPSMB puzzle to give patients great smiles in a short period of time.
4. Understand what a safe procedure PPSMB is for their patients.
5. Learn the advantages of combining PPSMB with cosmetic and restorative dentistry.

This CE activity is supported by an unrestricted grant from Brasseler USA and Ortho Organizers, Inc.

Advanced Practice Management for Every Dental Practice

Speaker: Dr. Louis Malmacher

Synopsis:

The primary goal of this program is to teach new, powerful clinical and practice management techniques. These practical concepts are designed to teach you how to motivate patients to ask for treatment, how to offer new dental services, let patients try out their dentistry before treatment, substantially lower your overhead, show you how to easily make dentistry affordable for patients, significantly reduce your stress, and have fun doing dentistry. This course is fast paced, highly motivational, entertaining, and educational, and is recommended for dentists, dental hygienists, dental assistants and office managers.

Educational objectives: Upon completion of this course, participants should be able to achieve the following:

1. Motivate patients to ASK for treatment!
2. Create line extensions for the office – laser dentistry, one hour whitening, treating bad breath, no prep veneers
3. Develop clinical techniques that will stimulate the rest of the practice
4. Establish which procedures are really profitable
5. Learn how to let patients try out their dentistry before treatment
6. Learn how to maintain an overhead of 50% or less
7. Learn how easily patients can get affordable financing for dental treatment
8. Mix clinical and practice management to achieve faster, easier, better dentistry

This CE activity is supported by an unrestricted grant from Care Credit.
