Bluewave™
Soft Tissue Diode Laser

What is the most-talked-about feature of your laser?

The Bluewave's compact size and wireless foot pedal offers true lightweight portability, while boasting up to 5W of power and three preprogrammed settings (debride, perio and cut).

What is your approach to training new users of your laser?

To ensure clinicians immediately benefit from the full potential of the Bluewave laser, two online training courses (12 CE credits) are included with purchase.

What advice do you give dentists trying to incorporate laser procedures into their practices?

Keep your soft-tissue laser close at hand! Performing a variety of soft-tissue procedures more efficiently and with greater patient comfort and less healing time, the Bluewave Soft Tissue Diode Laser streamlines your workflow and allows for same-day, in-office treatment of many restorative or periodontal indications.
