

GLIDEWELL

DEDICATED TO INNOVATION SINCE 1970

Glidewell is one of the world's leading manufacturers of custom restorative services, dental materials and technologies. Founded in 1970 in Orange County, California, the company is dedicated to developing innovations that simplify treatment, optimize results and improve lives. Glidewell offers an array of restorative, implant and preventive services created with CAD/CAM workflows that enhance quality and maintain affordability for dentist and patient alike.

BRUXZIR ZIRCONIA

The BruxZir Zirconia family of restorative materials offers clinicians high-strength solutions that exceed patient aesthetic expectations. BruxZir Zirconia benefits from proprietary processing methods, which result in restorations with best-in-class translucency, enhanced shade matching and lasting toughness. Available in two formulations, BruxZir Zirconia provides solutions for most indications. Choose BruxZir Full-Strength for functionally demanding cases or BruxZir Esthetic for situations that require a premier appearance.

BruxZir restorations have been proven by independent researchers and clinicians. The research arm of Gordon J. Christensen's *Clinicians Report* concluded that BruxZir demonstrates outstanding performance even after 10 years of clinician service. Moreover, *Clinicians Report* recently stated that "BruxZir is the most successful tooth-colored restoration in the history of dentistry."

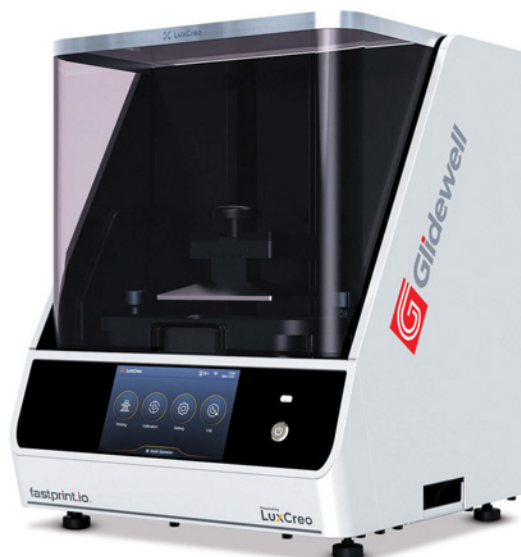

As of 2021, all Glidewell-made BruxZir restorations are warrantied for life. The BruxZir lifetime warranty is designed to give clinicians added peace of mind and to reinforce the positive relationship between practitioner and patient. Should a dentist need to replace the BruxZir restoration for any reason over the patient's lifetime, Glidewell will remake the restoration at no cost to the dentist.

HAHN TAPERED IMPLANT SYSTEM

If you're among a growing number of dentists seeking to expand your implant services, the Hahn Tapered Implant System can help your practice thrive through everyday cost savings and one of the strongest warranties in implant dentistry. At \$168 each, the Hahn implant is available at a fraction of the price of some other premium implant systems. Plus, get 20% off every time you restore your Hahn case at Glidewell.

The Hahn tapered implant's design is based on Dr. Jack Hahn's 50-plus years of clinical experience. It offers a simple, efficient and effective solution for a full range of indications. Features include a simplified surgical protocol with length-specific drills. The implant's deep, sharp threads engage bone where it is directed while maximizing primary stability.

FASTPRINT.IO 3D PRINTING SOLUTION

Discover the next wave of digital dentistry with the Fastprint.io 3D Printing Solution. In a new partnership that combines the innovation of LuxCreo with the simplified workflow of the Glidewell.io In-Office Solution, Fastprint.io gives clinicians an efficient and cost-effective 3D printing experience with greater control over their clinical options. With a range of resins developed and used by Glidewell, dental professionals will be able to create models and nightguards with a streamlined workflow. Plus, a variety of LuxCreo-compatible materials make it possible to print crowns, retainers and aligners. Additional indications—including dentures—are currently in development. The Fastprint.io requires minimal postprocessing, compared with other 3D-printed technologies, and can directly print clear appliances with LuxCreo Digital Polishing. The versatile 3D printer uses the same proven AI-powered design software used at Glidewell to simplify the production process for increased efficiency and output. The Fastprint.io 3D Printing Solution comes bundled with a starter kit, wash station and cure station.
