

## CREODENT

### SOLIDEX CUSTOM ABUTMENT

**S**olidex customized abutments redefine implant customization with industry-leading precision and strength.

At the heart of Solidex is the proprietary SIQ (Split-in-Quad) Swiss Turn Milling technology—engineered to deliver unmatched accuracy, retention and fit for even the most demanding restorations.

Backed by FDA 510(k) clearances on 15 major implant systems, Solidex ensures full regulatory compliance, protecting practices and patients from the risks associated with non-validated abutment use.

Its advanced Split File Technology enhances digital workflows by enabling seamless collaboration between labs and clinics, improving turnaround time and restorative precision.

Crafted from Grade 5 ELI Titanium, each abutment guarantees durability and

biocompatibility, with a lifetime warranty for added peace of mind.

Whether you're restoring single units or complex full-arch cases, Solidex empowers clinicians with the confidence to deliver long-lasting outcomes.

#### HIGHLIGHTS

- **Maximum precision & retention:** SIQ Swiss Turn Milling delivers superior fit and customization.
- **FDA-cleared assurance:** 15 FDA 510(k) clearances ensure safety and compliance.
- **Seamless workflow integration:** Split File Technology supports.
