

PAC-DENT

RODIN RAPIDCERAM

Rodin RapidCeram is a ceramic nanohybrid resin designed for same-day digital dentistry. It prints up to two times faster than other ceramic-filled resins without compromising the strength, aesthetics and precision that define the Rodin line. Formulated with over 51% ceramic filler, it achieves optimal mechanical strength and lifelike translucency, enabling high-quality restorations that require minimal post-processing.

Ideal for same-day crowns, bridges and denture teeth, it streamlines workflows with easy handling and fast post-processing—reducing turnaround time and enhancing efficiency and patient satisfaction. Compatible with leading printers, it offers a versatile, high-performance solution for modern restorative practices.

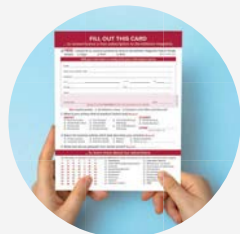

For more information, visit rodin-3d.com.

HIGHLIGHTS

- **High-speed printing.** Prints up to two times faster than conventional ceramic resins, enabling efficient same-day workflows and reducing chair time without compromising quality or aesthetics.
- **Contains more than 51% ceramic filler.** Delivering consistent strength and aesthetic translucency for high-quality restorations with minimal post-processing.
