### OPALESCENCE HOME ADVANCED

**T**eeth whitening should be effective, easy to use and comfortable. Opalescence Home Advanced offers a professional-level whitening experience with a simplified, one-step treatment that patients can do from the comfort of home.

The ready-to-use trays require no impressions, lights or additional trays. The flexible UltraFit tray molds to any smile, delivering whitening gel exactly where it is needed, ensuring consistent results and greater comfort during each treatment. Cutting-edge technology lines the tray with whitening gel for precise placement.

With concentrations of 10% and 15% hydrogen peroxide, patients can choose the strength and wear time that works best for their schedule and sensitivity levels. In as little as 15 minutes per treatment, patients can achieve a noticeably whiter smile in just a few treatments.

Designed by dental professionals and backed by the trusted Opalescence brand, Home Advanced combines clinical strength with user-friendly design. The sleek packaging and intuitive application reflect a modern approach to whitening that patients appreciate and providers can confidently recommend.

#### HIGHLIGHTS

- **Simple, one-step application with no need for impressions, lights or extra trays.** Patients simply open the package, place the tray on their teeth and begin whitening.
- **UltraFit trays deliver precise, mess-free gel placement.** The gel stays in place during treatment and is applied evenly across the teeth for consistent results, while minimizing the risk of gum irritation and post-treatment sensitivity.
- **Noticeably whiter smiles with wear times as short as 15 minutes per treatment.** Whether they prefer quick 15-minute treatments or longer whitening sessions, Opalescence Home Advanced provides dramatic, professional-level results in just a few treatments.
