

DEXIS

Imprevo

The DEXIS Imprevo, powered by the advanced IS ScanFlow software, is a high-performing intraoral scanner designed to redefine digital dentistry with precision, speed, and versatility. Engineered for excellence, this wireless scanner empowers dental professionals to seamlessly navigate the full spectrum of intraoral digital workflows—delivering exceptional accuracy, effortless usability, and freedom of movement. Recognized by the Institute of Digital Dentistry as 2025 Most Improved Intraoral Scanner, Imprevo simplifies and accelerates scanning while delivering consistent, high-quality results across a wide range of clinical indications. Designed with a slim, ergonomic profile, Imprevo ensures comfort for both clinicians and patients. Its smaller, autoclavable universal tip supports a smoother scanning experience, while a 25 mm depth of field (-2 to +23 mm) allows seamless, reliable capture in tight, hard-to-reach areas—delivering sharp detail even in complex intraoral environments.

Its laser technology, 40 FPS frame rate, and CUDA powered parallel processing architecture allow for faster, high-speed scans. Dual-sensor technology combines laser precision with white LED illumination to generate highly detailed, realistic color-rendered scans that enhance diagnosis, case communication, and lab collaboration. Advanced scanning algorithms

support faster capture and consistently accurate digital impressions with fewer interruptions. Imprevo streamlines the workday with faster scans, fewer rescans, and AI-assisted workflows that adapt to the practice. Imprevo offers a continuously advancing software platform that unlocks new capabilities over time and protects your long-term investment.

HIGHLIGHTS

- **Greater clinical efficiency.** Faster scans, fewer rescans, and more accurate impressions help enhance productivity. Imprevo delivers realistic visuals that help patients better understand their care—leading to greater trust, case acceptance, and satisfaction.
- **Enhanced patient comfort.** Imprevo helps transform the patient experience with its sleek, smaller, reusable, autoclavable universal scanning tip, designed to support a quicker and more comfortable scanning experience.
- **Confidence in every scan.** Imprevo's 25 mm total depth of field and superior image fidelity deliver faster, more accurate scans, helping reduce rescans and support smoother collaboration.
