Simply Natural 3D Flexible Partials

Simply Natural 3D Flexible Partials are digitally designed, precision-manufactured removables created to reduce remakes and long delivery appointments. With more predictable fit, cleaner margins, and minimized pressure points, patients will experience less grinding, fewer sore spots, and fewer return visits.

The lightweight, flexible material provides natural movement, giving patients the comfort and retention they want so their partials don't go unworn. The metal-free design also offers a highly aesthetic solution without the cost or invasiveness of fixed alternatives—making treatment acceptance conversations easier and faster.

Dental practices see the benefits, too, as digital workflows reduce confusion, remakes, and case delays. There are fewer surprises from

impressions, fewer calls to troubleshoot, and more control over dentists' schedules.

Simply Natural 3D Flexible Partials take practices to a higher level—without working harder.

HIGHLIGHTS

- **Digitally designed for accuracy:** consistent fit, fewer adjustments
- **3D-printed flexibility:** adapts to micro-movements for all-day comfort
- **Streamlined workflow:** fast turnaround, repeatable outcomes
