SERVICE AND REPAIRS

HuFriedyGroup

The complete solution for preventive care

HuFriedyGroup's preventive care solution combines advanced technology, innovative instrumentation, and ongoing support to help practices deliver efficient, comfortable, and consistent patient care. At the center of the solution is PWR Therapeutic Air Polishing, designed to efficiently remove biofilm and tough stains both supra- and subgingivally. By streamlining biofilm management and stain removal, clinicians can save an average of 8–12 minutes per patient while enhancing treatment efficiency and patient comfort.

Supporting daily instrumentation needs are Harmony Scalers with EverEdge 2.0 Technology. Designed with both performance and ergonomics in mind, Harmony Scalers stay sharper longer and require up to 65% less pinch force compared to leading competitors. Their ergonomic design helps reduce hand strain and supports clinician comfort during repetitive procedures, while long-lasting sharpness promotes procedural consistency and reduces the need for frequent sharpening. To help protect these investments, EverCare Service and Repair provides streamlined maintenance and repair for both PWR devices and scalars. With reliable support and expert service, practices can maximize

equipment performance, minimize downtime, and extend the life of their clinical assets.

Together, PWR Therapeutic Air Polishing, Harmony Scalers with EverEdge 2.0 Technology, and EverCare Service and Repair create a complete preventive care solution that helps practices improve efficiency, support clinician well-being, and deliver exceptional patient experiences.

HIGHLIGHTS

- Save valuable chair time with PWR Therapeutic Air Polishing, which removes biofilm and tough stains supra- and subgingivally while saving an average of 8–12 minutes per patient.
- Support clinician comfort with Harmony Scalers featuring EverEdge 2.0 Technology, providing up to 65% less pinch force and longer-lasting sharpness to help reduce hand fatigue.
- Protect your investment with EverCare Service and Repair, delivering streamlined maintenance, service, and repairs for PWR devices and scalars to maximize performance and minimize downtime.
