Check Out These Paperless Products

Apixia PSP Scanner

This Phosphor Plate Scanner, made by Apixia Digital Imaging, offers doctors the convenience of in-operatory acquisition of digital X-rays. The scanner, which is no bigger than a standard coffee maker, includes easy-to-use imaging software and optionally integrates with all leading brands of practice management software. It's a great way to convert your film X-rays to a paperless system. Apixia products are sold factory-direct. For more information, visit Apixia at www.apixia.com.

Smile Reminder

Smile Reminder is a practice-to-patient communication service designed to maintain and retain existing patients while identifying and acquiring new patients. Utilizing the latest automated text and e-mail messaging technologies and social media tools, Smile Reminder helps you to increase productivity and grow your practice, while you focus on your patients. These reminders eliminate the need for appointment confirmation phone calls and recall postcards. For more information visit www.smilereminder.com or call 866-605-6867.

DentalSharing

DentalSharing.com provides the dental community with a simple, Web-based service to securely share, manage and store digital images and related documents in full compliance with HIPAA requirements. The service does not require any incremental hardware or software investment and retains the full resolution of original X-ray images. DentalSharing.com is compatible with all practice imaging management systems. Subscribers may also send and receive comments related to the shared images. For more information visit www.dentalsharing.com.

ePadLink

ePad Vision is a state-of-the-art electronic signature device from ePadLink. It features a stunning full-color hi-res LCD screen that displays the user's signature in real time as well as interactive text and graphics. The display images can be uploaded to the device and controlled from an easy-to-use graphical user interface. ePad Vision is also bundled at no extra charge with IntegriSign Desktop software, which allows users to add electronic signatures directly into MS Office and Adobe PDF documents. Visit www.epadlink.com.

VIDAR's Dental Film Digitizer

Ideal for offices that are already using digital intraoral imaging but have not yet made the conversion with their panoramic and cephalometric imaging equipment. This machine allows dentists to create quality digital images from analog dental film for primary diagnostic use. It connects to a computer with a USB cable and uses a simple TWAIN interface. It also meets all U.S. and European guidelines. For more information visit www.vidar.com or call 703-925-2371. ■
