Dolphin Imaging & Management Solutions

More than just a software company

Dolphin Imaging & Management Solutions has tools for 2-D and 3-D image management and rendering, plus a patient education module. Dolphin Management is fully customizable for both small and multilocation practices.

Dolphin Imaging & Management Solutions has served the orthodontic community for 30 years and is proud to be chosen by 10,000 customers worldwide who enjoy the convenience of local representatives for sales and service. The team's close involvement with doctors, researchers and residents has influenced the trajectory of its software development and earned respect from all corners of the profession. Institutions, researchers, clinicians and consultants habitually turn to Dolphin for insight and experience in clinical, technological and historical areas of orthodontics.

Respected

The Dolphin team is often called upon for its individual and collective knowledge, insight and expertise in the form of journal articles, textbook chapters and presentations at academic events. The company was featured in the peer-reviewed article "Evolution of Imaging and Management Systems in Orthodontics," published in the June 2016 issue of the *American Journal of Orthodontics & Dentofacial Orthopedics*, and a chapter on digital imaging in orthodontics in the textbook *Clinical Orthodontics: Current Concepts, Goals and Mechanics*, published by Elsevier in 2010 and updated in 2015. The company was also featured in presentations and accompanying textbook chapters at the Moyer's Symposium (2002, 2005, 2013) and participates in the Joint Cephalometric Experts Group at Case Western University.

Many industry consultants are proud to have their philosophies and protocols delivered to orthodontists via Dolphin software, including Karen Moawad's Hummingbird Reports, the Ricketts VTO/Roth-Williams AEO VTO Wizard and the Zuelke Financial Expert, Charlene White's SOS, and McLaughlin Dental VTO add-on software modules.

Trusted

Dolphin is the official software of the Functional and Cosmetic Excellence program, the Advanced Education in Orthodontics Group, the McLaughlin two-year postgraduate orthodontic course series and Smiles Change Lives. Researchers, whose studies are published in clinical journals worldwide, consistently use Dolphin software.

Dedicated

Dolphin invests in the progress and future of orthodontics as a regent corporate partner of the American Association of Orthodontists Foundation and a sponsor of the JCO Student of the Year Award. The company also donates software to schools, with 97 percent of orthodontic residency programs regularly using Dolphin.

Progressive

Dolphin has earned its reputation for being one step ahead in anticipating the needs of orthodontists, and utilizing the latest technologies to deliver solutions. Its product line includes 2-D and 3-D imaging, practice management, patient education, mobile solutions for both practitioners and patients, and cloud services. ∎

Dolphin offers mobile products and services for doctors, staff and patients.
