### CURING LIGHTS: DENTAL LED

#### Ultradent Products: Valo

Valo LED curing lights use a custom, multiwavelength light-emitting diode for producing high-intensity light at 385–515nm, capable of polymerizing all light-cured dental materials. The ergonomic and streamlined design enables Valo curing lights to reach all curing sites without sacrificing patient comfort. Unibody construction ensures durability and unsurpassed heat dissipation.

**HANDPIECES: ELECTRIC HIGH-/LOW-SPEED**

**KaVo: Mastermatic**

With the introduction of Mastermatic handpieces, KaVo offers a comprehensive electrics upgrade system. The product provides clinicians with a solution for synchronized efficiency because it incorporates a short, lightweight motor, a reliable triple-gear system and the company's smallest head size for improved access and visibility.
