

RADIOLOGY

X-RAY EQUIPMENT: CONEBEAM CT SCANNER

Planmeca USA: Planmeca ProMax 3D

Planmeca ProMax 3D units offer exceptional image quality and innovation. A broad range of volume sizes are available for imaging the entire maxillofacial area to endodontic evaluations. Advanced technology, such as Planmeca Calm and Planmeca Ultra Low Dose, pave the way for using CBCT imaging for routine diagnostic protocols.

X-RAY EQUIPMENT: INTRAORAL MACHINES

Dexis: Nomad Pro 2 Handheld X-Ray System

Capture detailed, high-quality X-ray images in the operator's side with the handheld, portable Nomad Pro 2 system. No more leaving the room or patient's side to take X-rays. Featuring two innovative shields, Nomad Pro 2 creates a safe zone for the operator while adding comfort and confidence for the patient.

X-RAY EQUIPMENT: DIGITAL X-RAY SENSORS

Dexis: Dexis Titanium

Robust and comfortably sized for every patient, Dexis Titanium sensors capture consistently phenomenal images that provide improved tissue contrast even at low doses. With cleaner data than the legacy Dexis platinum sensor and improved image integrity, doctors will see the anatomical details they need for a confident diagnosis.

X-RAY EQUIPMENT: PANORAMIC/CEPHALOMETRIC MACHINES (DIGITAL)

Planmeca USA: Planmeca ProMax 2D S3

The Planmeca ProMax 2D S3 sets a benchmark in panoramic imaging. This unit offers autofocus technology for exceptional image clarity, even on anterior teeth. It also includes Planmeca's true extraoral bitewings, pan segmentation, linear tomography, and sinus and TMJ programs. Stay current—ProMax 2D S3 is upgradable to 3D.
