

## INFECTION CONTROL

### SURFACE DISINFECTANTS

## Kerr: CaviCide Spray and CaviWipes

CaviCide spray and CaviWipes kill clinically relevant organisms such as bacteria, viruses, fungi and TB in just three minutes.

These products are ready to use, with no dilution or mixing required. CaviCide and CaviWipes clean and disinfect hard, nonporous surfaces in your facility with speed and confidence.

**MULTIYEAR  
WINNER**  
since 2006

**TG'S TAKE:** *"The signature pink and white label can be spotted on the counters and in the cabinets of many dental practices across the country. Team members love the convenience of grabbing a wipe with the right amount of product or the economy of using a premixed solution in a spray bottle to ensure their operatories are clean and ready for the next patient. The pandemic reminded us of the importance of what we have always done in dentistry—solid infection control practices."*
