RESTORATIVE DENTISTRY

MATRIX MATERIALS AND SYSTEMS

Garrison Dental Solutions: Garrison Sectional Matrix System

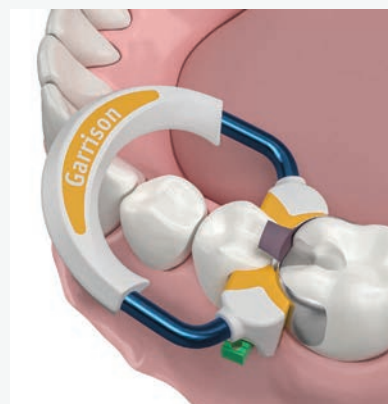

The Strata-G Sectional Matrix is engineered to successfully complete a wider variety of Class II composite restorations. This comprehensive kit includes three varieties of separator rings, five sizes of matrix bands, four sizes of interproximal wedges and ring placement forceps. Strata-G is indicated for use in posterior Class II MO/DO, MOD and wide preparation restorations.

TG's Take: *A repeat winner, Garrison's sectional matrix system is a staple for predictable contours and contacts in Class II restorations, beloved in general dentistry. By enhancing adaptation and reducing flash, this system simplifies the process for consistent results. It's an essential tool that tackles one of restorative dentistry's biggest challenges.*

NON-RUBBER DAM ISOLATION

Zyris, Inc.: Zyris Isolite Dental Isolation Systems

The Zyris Isolite Dental Isolation System was developed to deliver superior isolation and access with patient safety and comfort in mind. The all-in-one Isolite system allows clinicians to achieve optimal visibility, moisture and aerosol control, patient compliance, improved efficiency and consistent results—while providing exceptional patient comfort and safety!

TG's Take: *A multi-year winner, Zyris Isolite revolutionizes isolation for restorative work, ensuring a dry field and efficiency without compromise. It integrates suction, retraction and illumination into one system, saving valuable chair time. Clinicians who use Zyris often report better visibility and an overall smoother workflow.*
